

INSTRUCTIONS FOR USING OVERLEAF TEMPLATE

WSC is providing, for the first time, an Overleaf template to allow authors to write papers using LaTeX without the requirement for a local installation. Overleaf is a free cloud-based, collaborative authoring tool.

- Overleaf is a collaborative platform: Authors can easily invite colleagues to collaborate on their document.
- The platform automatically compiles the document while an author writes, so the author can see what the finished file will look like in real time.
- The template is available at [WSC2019Template](#).

To use Overleaf, create an account (or use an existing account), then go to the WSC 2019 template page, and click “Open as Template”. This will create a project for you containing the template files. You can then rename the project and modify these files to write your paper.

- For Inquires related to the use of overleaf template, please contact [Giulia Pedrielli](#) (developer of the WSC19 OverLeaf Template) and copy [Navonil Mustafee](#) (WSC 2019 Proceedings Lead).
